Explorer. Start-up settings for system and applications, Auto-Play, and Internet Explorer settings allow to configure frequently run processes, optimise startup and shutdown sequences, as well as allow to enable or disable Internet Explorer, Media Player, and other tools. As all the settings must be saved on a local hard drive or removable media, Advanced Optimizer creates a backup to a USB drive or CD/DVD prior to applying the settings. Advanced Optimizer does not require additional software to be installed. Network Manager is a cross-platform application that allows you to set up or repair networks with a single touch. NetworkManager is an open source project, with an active community of volunteers and users, including system administrators, engineers and developers. It is easy and powerful to

use. Regardless of whether you are working with wireless or wired connections, NetworkManager delivers a single solution to set up, configure, monitor and maintain all your network interfaces. NetworkManager automatically detects your current network connection and connects to it. It allows you to configure wired, wireless and VPN connections, and also supports DHCP and static addressing. The best new features include stateless DHCP, multiple connections per user and SMS/Email notifications. Network Manager simplifies the configuration of wireless networks and prioritises connections depending on the type of service provided. You can also get a separate icon for each network interface, thanks to a new interfaces view. Panes software is a suite of windows-based

programs that you can use to manage your personal data and other information. You can open documents, manage the contents of your computer, as well as access web pages, send emails, and manage the settings of your application, such as new program options or browser settings. Furthermore, you can backup and recover information in case it gets lost. The software is lightweight, versatile and easy to use. However, we think that

Pane Pals has a somewhat limited coverage of features, and does not offer a 'lite' version. We strongly recommend
