After years of dominance in the industry, Autodesk was confronted with serious challenges in the years that followed. First, in 1998, Corel introduced CADx (now Revit), and other companies followed with their own 3D CAD programs. Then, in 2000, Maxon acquired the company. The Maxon product lineup also included animation, video, graphics, image editing, and rendering software, and was available in both traditional desktop and cloud models. However, Maxon's focus shifted towards cloud-based software. Autodesk, on the other hand, gained more market share. In 2013, Autodesk reported record annual revenues of \$5.86 billion, a 70% jump over the prior year. 1. An icon of the familiar Autodesk logo with the words "AutoCAD 2022 Crack" on it. 2. The history of Autodesk is as old as the history of computer-aided design. In the 1950s, the drafting branch of the Royal Canadian Air Force was in need of a CAD application. The government-funded Air Sciences Engineering Lab (ASEL) developed a prototype of a drafting program. ASEL was an innovative research laboratory within the Department of Transport at the University of Toronto. ASEL started as a sub-unit of the Department of Transport, headed by Dr. William W. Smith, a professor of mechanical engineering. Smith had worked with the Canadian department of Transport during World War II, when he was a member of the Scientific Air Intelligence Unit, the forerunner to the present-day Canadian Security Intelligence Service (CSIS). Smith was also a professor at the University of Toronto. The prototype ASEL CAD program would later be used to develop CAD programs for the manufacturing sector. It was later taken up by a group of graduates of the University of Toronto, including Dr. Warren P. Marshall, Dr. Brian Beaudry

Autodesk also operates educational sites at US colleges and universities, including Harvard University's "Autodesk University Online" (AUO) and Massachusetts Institute of Technology's "Autodesk University for Civil and Construction Engineering" (AUECCE). Autodesk University Online is an in-person training program that is provided through Autodesk University and Autodesk Authorized Resellers worldwide.
