Download file from links given above. Open the downloaded setup file using WinRAR. Now select a folder in WinRAR where you want to install it. Extract all files which came inside the setup file. Copy the entire folder into "C:/Program Files" folder in your Windows OS. Now start using!

1. Field of the Invention The present invention relates to a method of, and a system for, testing a wireless network, and, more particularly, to a method of and system for testing a wireless network for performance with respect to multiple access points of the wireless network.

2. Description of the Related Art As is well known to those skilled in the art, a wireless network may be composed of a single access point or multiple access points. If, for example, a wireless network is composed of a single access point, then the access point is a master access point. As is also well known to those skilled in the art, a master access point transmits a variety of information to other access points connected thereto. For example, the master access point transmits information concerning access points that are connected thereto and also transmits operation and maintenance information. Conversely, if the wireless network is composed of multiple access points, then the access points are slave access points. As is also well known to those skilled in the art, a slave access point is configured to receive messages and information from the master access point or other access points connected thereto.
